

Vectra Core Systems — One-Page Past Performance (short bullets)

1) UMB Financial — Conversational AI Systems - Role: Lead Architect & DevOps - Dates: Jan 2026 – Present - Scope: Designed and deployed 4 production AI chat systems and 1 autonomous agent using Amazon Bedrock and SageMaker; implemented secure data flows, role-based access controls, logging and monitoring, and operational runbooks. Delivered production pilot with 99.9% SLA during initial rollout. - POC: [Name, email] — available on request

2) Enterprise Cloud Operations — Large Financial / Commerce Environments - Role: Senior Cloud Engineer - Dates: Jun 2020 – May 2025 - Scope: Supported enterprise-scale infrastructure across hybrid cloud, automated CI/CD pipelines, incident response playbooks, and system hardening including NIST control mapping and automated remediation. - POC: [Name, email] — available on request

3) Oracle Enterprise Infrastructure — Systems Engineering - Role: Senior Systems Engineer - Dates: Jan 2018 – May 2020 - Scope: Enterprise systems integration, high-availability architecture, capacity planning, and secure operational support for large-scale database and middleware environments. - POC: [Name, email] — available on request

4) Cloud Security Hardening & Compliance - Role: Security Architect - Dates: Various (2019–2025) - Scope: Performed cloud security baseline implementations, vulnerability remediation, FedRAMP/NIST-aligned control mappings, and blue/red team assessments for regulated workloads. - POC: [Name, email] — available on request

For each item we can provide a short narrative, contract numbers (if releasable), exact dates, and POC details upon request. Replace the POC placeholders with contact info when available.
